

*Migrate off the mainframe, save time and money while gaining flexibility.*

## Transforming Mainframe Applications is Easier than You Think

GT Software's Neo Suite makes mainframe migration easy and low risk. We are the leader in migrations of applications and data from IBM mainframes to the Microsoft .NET/Windows® environment. We specialize in helping customers minimize risk by identifying which information assets are good candidates for migration.

## How Can You Benefit from the Neo Suite?

### Future-proof Technology

The Neo Suite allows you to replace cumbersome text screens with modern, graphical interfaces. Development teams can build customer web portals and create applications to move your business to the next level.

### Increase Responsiveness

Enable your business with advanced Microsoft business tools— the .NET Framework® integrates with Microsoft Exchange, SharePoint®, Dynamics®, Windows, and Windows Azure™. Developers can now code quickly and efficiently in a modern environment.

### Improve Productivity

The Neo Suite is completely integrated with Microsoft Visual Studio®, allowing developers to code and debug quickly and efficiently. GT Software customers have seen developer productivity improve by 20 to 50 percent when switching to Microsoft Visual Studio, as rapid application development becomes a reality.

### Significantly Reduce Costs

Distributed systems are inexpensive and powerful. Microsoft Windows Server® platform and Microsoft Visual Studio are the most efficient programming environments on the market today. Together, they reduce IT costs by as much as 90 percent.

### Avoid Code Remediation

The Neo Suite can migrate 96 percent of mainframe code without remediation. Our team of experts help you inspect your code, find discrepancies that could slow down migration, and correct issues without affecting functionality or reliability.

### Expert Guidance

GT Software's Professional Services can help guide your team through the transition from the mainframe to the Microsoft platform. Once migration is complete, our team can assist with software setup, configuration, and the establishment of "Best Practices" for your IT infrastructure.

### NO COBOL Runtime Fees!

Fujitsu NetCOBOL for .NET (distributed by GT Software) is the only COBOL compiler available that does not charge for COBOL runtimes.

## Product Overview

# NEO Suite

### NeoBatch®

Boost Batch Processing

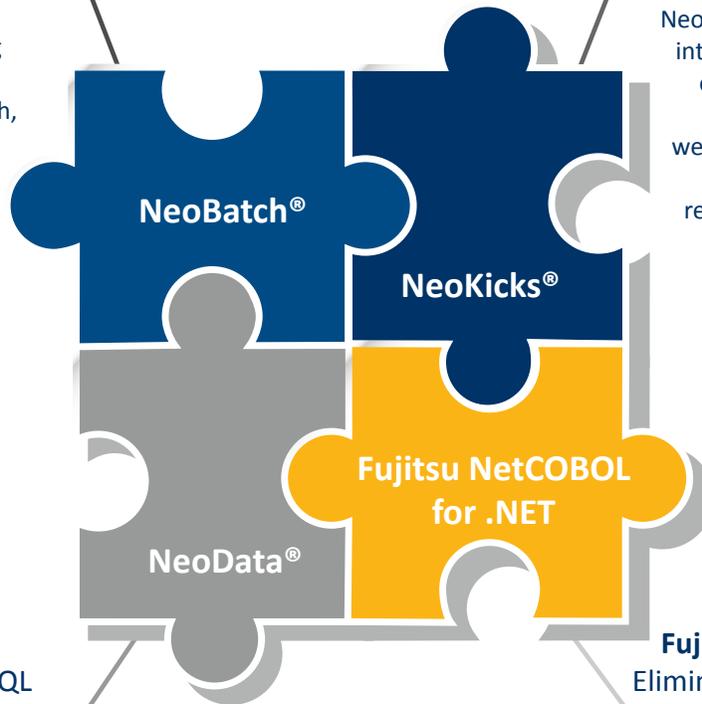

NeoBatch executes JCL batch jobs in Windows. Managing processing jobs is easy with a simple-to-use graphical interface. With NeoBatch, you can distribute jobs among servers, monitor performance, and analyze job statistics using SQL Server reports.

### NeoKicks®

Streamline CICS

NeoKicks replaces clunky, text-based interfaces with sleek graphical user environments by converting CICS BMS map screens into ASP.NET web pages. The screens retain their original functionality, but can be redesigned to suit business needs.

### NeoData®

Transform VSAM to SQL

NeoData frees data from old, outdated formats by migrating VSAM or indexed file data to Microsoft SQL Server. It's possible to access data whenever and however you want.

### Fujitsu NetCOBOL for .NET

Eliminate COBOL runtime fees

NetCOBOL for .NET allows you to add new functionality to your COBOL with modern programming languages (C#, C++, and VB) and the ability to leverage the powerful Microsoft .NET framework.

ISV/Software Solutions

For over 30 years, GT Software has helped enterprise organizations unify business information across platforms, data formats and programming languages — including the "hard to access" mainframe. More than 2,500 organizations across the globe trust GT Software to help them improve business intelligence, workforce productivity and customer experience.
